

## **NOTICE**

### **WATER QUALITY TESTING SCAM**

An unscrupulous company has been contacting members of the public claiming to be from the Township of Tay requesting entry into private residences on the pretext of testing water quality.

This company will then use additives and false testing equipment to claim serious issues with the homeowner's drinking water and attempt to sell expensive and unnecessary water filtration equipment costing thousands of dollars.

If you are contacted by someone claiming to be from the Township of Tay requesting entry into your home, please call the Township of Tay Municipal Office at one of the numbers shown below. In this way you can confirm that the call is genuine.

A genuine Township of Tay Water Department employee will be driving a white van or white pick-up truck with the Township logo on the side. The employee will be dressed in orange safety clothing. The office staff can contact the operator by two-way radio to verify his or her identity and location.

Municipal drinking water is tested regularly and is perfectly safe to drink without the need for expensive add-on equipment. These results are available for viewing at any time during regular office hours. If you have any concerns or questions about your water quality, please call the Township of Tay Municipal Office.

Township of Tay Municipal Office: 534-7248 ext. 255
